

Share your feedback on Amazon DynamoDB
Your feedback is an important part of helping us provide a better customer experience. Take this short survey to let us know how we're doing.

Table details

Table name

You will be used to identify your table.

Musica

Between 3 and 255 characters, containing only letters, numbers, underscores (_), hyphens (-), and periods (.).

Partition key

The partition key is part of the table's primary key. It is a hash value that is used to retrieve items from your table and allocate data across hosts for scalability and availability.

Artista

String

Sort key - optional

The sort key is part of the second part of a table's primary key. The sort key allows you to sort or search among all items sharing the same partition key.

TituloCancion

String

Table settings

Default settings

The fastest way to create your table. You can modify these settings now or after your table has been created.

Customize settings

Use these advanced features to make DynamoDB work better for your needs.

Default table settings

These are the default settings for your new table. You can change some of these settings after creating the table.

Setting	Value	Editable after creation
Table class	DynamoDB Standard	Yes
